Solar Cell Efficiency	>18%
Output	USB 1 5V 1A; USB 2 5V 2A
Input	DC 5V 2A
Battery Capacity	10000mah
Battery Type	polymer lithium battery
Materials	ABS
Size	155 x 164 x 15 mm
Weight	around 300g
Color	gray / black / red
Warranty	1 year
Application	Mobile Phone, Tablet, Power Bank, PSP, MP4, GPS, Earphone

### 10000mah Portable Solar Battery Charger Description

#### 1) A great solar powered power bank

A solar panel is without battery inside to store power and it can be only used under direct sunlight. If you are hiking in a rainforest, or at night but your phone is powered off..., the solar panel is helpless. Then a power bank may maximumly charge your phone 3-4 times, but you can not find a power source to recharge it... That will be a very bad thing when outside. Thus this GGXingEnergy® 10000mah portable solar battery charger will solve such embarrassed issues for you. When sunshine available, you can extend the solar panel to recharge the battery. Then you can use the battery to charge your phone and other 5v devices at any time. No worry for power losing again.

The battery is removable with  
the solar panel.

2) A fantastic portable and foldable design to bring you huge convenience for outdoor use. This portable solar battery charger is with kinds of foldable solar panels. There are economic 4w solar panel, or faster charging 6w solar panel, or advanced 8w solar panel for option. When not using, you can fold them back and put into your travel bag. The battery body is fixed well together with the solar panel when it is charged. When you want to use the battery to charge your phone, you can move the battery, do not need to take the solar panel together. You can also hang this portable solar battery charger on your backpack.

3) More functional with LED light and SOS

This portable solar battery charger is with super bright LED light, which can be used as a flashlight. Also, it can be changed to SOS mode.

# LED Lighting + SOS Function
